

PROFILE FOR PHOTOVOLTAIC TECHNICAL SUPPORT

PUNCHED HOLES:

The profiles can have holes punched in them, thus facilitating their installation and optimizing assembly time.

These holes are available in different sizes.

For holes other than those offered, please contact us.

PACKAGING:

Standard packing: 2 metal straps per package, with the possibility of dividing into two packages using nylon straps.

Other types of packaging are also possible at the customer's request, upon prior consultation.

STORAGE:

We recommended storing the packages in a dry and covered place, avoiding contact with water or humidity while they are still strapped. If the package gets wet by accident, it is advisable to undo it and separate the profiles to dry.

HANDLING:

For your safety, under no circumstances should the packages be lifted by the straps.

Examples of standard handling: other types of handling are also possible upon customer request, subject to consultation.
