

# Flashing

Accessories

## DESCRIPTION

We can supply a wide range of flashings which provide the answer to all types of detailed construction finishes, achieving both practicality and an appearance appropriate to the needs of any kind of project. We can carry out all types of cutting and folding work as may be required, no matter what type of job you are working on.

## STANDARDS

Flashings are made from coated steel sheet complying with the following standards: Galvanised Steel: UNE-EN 10143 and Pre-Coated Steel: UNE-EN 10169.

## FINISHES

Using top quality raw materials, we can manufacture flashings in lengths of up to 6 metres, with thicknesses from 0.5 mm up to 3 mm, and with various finishes: galvanised, prepainted, pickled, cold rolled, hot coated, aluminium and copper.
